

Hosted Solutions

Telephony, Networking and Business Applications

CONTACT US: 314.392.6900

Let's talk about the advantages of a hosted infrastructure and about the apps that can propel your business!

Is this you?

If you want to buy a meal for your employees, would you purchase a building, install a kitchen, buy the groceries, hire a cook and wait staff and have them make the meal?

Or...
Would you simply have it catered?

It makes a lot more sense to have a local Café take care of your needs. Then you can focus on your business and what it is that makes you successful.

That is what Hosted Café is all about.

A common sense business approach where we cater to your Telephony, Networking and Business productivity needs.

That way you're free to focus on your business and what it is that makes you successful.

WHAT WE DO

We provide a fully hosted and managed service that includes telephones and internet, as well as other productivity applications, from email to call recording to desktop faxing to CRM, and much, much more.

We help you create a solution that is customized for your organization, and then we support every bit of it... 24x7x365!

WHO WE ARE

Hosted Café is a unique offering that brings together your Cisco systems infrastructure and a myriad of voice, data and business applications... and support for all of it.

As part of the Netelligent Corporation, you can be confident that we thoroughly understand technology, and have insight into each customer's uniqueness. We are phenomenal at constructing, implementing and supporting business solutions and enabling our clients react to the changing business needs..
