

Our Story is simple. We began Netelligent Corporation in 2003 when a small group of really talented technology engineers made the decision to create an organization that they could feel fantastic about.

We have evolved and grown quite a bit since our birth while staying true to our initial vision. We are proud of our Company, what we do and what we stand for.

- Wallboard & UCC Stats
- Enterprise Console
- Paging & XML Messaging

It begins with people, relationships, customers, staff and partners. Add in expertise, experience, methodology, communications and tools, and you have both our vision and our reality as to how we do business.

More than technology experts.

In all of our collateral you will see we have a unique style and strategy... though we think it's common sense. You will see that we focus on real world examples of our work with real clients. The idea is not to have lengthy Case Studies, just short, focused accounts (Real Bits) of what we've done for organizations like yours.

On the other side, we want you to know who we are and who you're working with. So, we have miniature biographies on members of our team. We call those "Us".

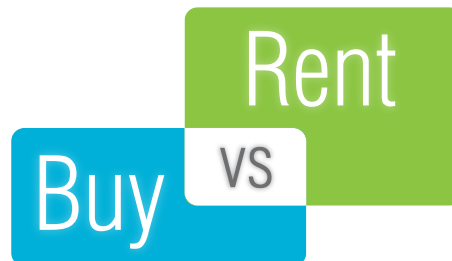

Mission

Our ultimate goal is that our Clients have the highest trust in our people, processes and counsel.

When our Clients think of us, we want to have no lines between the Netelligent Team and their own.

From our initial meeting, through sales, architecture, project management, implementation and support, we aim to earn our Clients' trust and first call.

Our Key Partners

Netelligent has a powerful vantage point, as we understand the pros and cons of both the Buy solution and the Rent solution. And, we can help you assess what is best for your organization today and where you plan to be tomorrow.
